

SUYAT, SHAMMY KIERSON L.

IV – CCSAD

Initializing git:

```
C:\Users\SHAM>cd Suyat_local_project  
  
C:\Users\SHAM\Suyat_local_project>git init  
Initialized empty Git repository in C:/Users/SHAM/Suyat_local_project/.git/  
  
C:\Users\SHAM\Suyat_local_project>
```

Adding README.md file and renaming current branch to "main":

```
C:\Users\SHAM\Suyat_local_project>echo "# Suyat Local Project" > README.md  
  
C:\Users\SHAM\Suyat_local_project>git add README.md  
  
C:\Users\SHAM\Suyat_local_project>git commit -m "initial commit: add readme"  
[master (root-commit) bd1733c] initial commit: add readme  
1 file changed, 1 insertion(+)  
create mode 100644 README.md  
  
C:\Users\SHAM\Suyat_local_project>git branch -M main
```

1. Create a new branch:
 - a. Create a new branch named "feature_x" to isolate your experimental changes.

```
C:\Users\SHAM\Suyat_local_project>git checkout -b feature_x  
Switched to a new branch 'feature_x'  
  
C:\Users\SHAM\Suyat_local_project>|
```

2. Stage changes:
 - a. Make modifications to your project files.
 - b. Stage the changes using the git add command.

```
C:\Users\SHAM\Suyat_local_project>echo "console.log('Hello from feature_x');" > feature.js  
  
C:\Users\SHAM\Suyat_local_project>git add feature.js
```

3. Commit changes:
 - a. Commit the staged changes to your local repository using the git commit command.
Provide a clear and concise commit message.

```
C:\Users\SHAM\Suyat_local_project>git commit -m "feat: add feature.js with initial experimental logic"
[feature_x db0e8b0] feat: add feature.js with initial experimental logic
1 file changed, 1 insertion(+)
create mode 100644 feature.js
```

4. Switch back to the main branch:
 - a. Use the git checkout command to switch back to the main branch.

```
C:\Users\SHAM\Suyat_local_project>git checkout main
Switched to branch 'main'
```

5. Merge changes from the feature branch:
 - a. Use the git merge command to merge the changes from the "feature_x" branch into the main branch. Resolve any merge conflicts that may arise.

```
C:\Users\SHAM\Suyat_local_project>git merge feature_x
Updating bd1733c..db0e8b0
Fast-forward
 feature.js | 1 +
1 file changed, 1 insertion(+)
create mode 100644 feature.js
```

6. Viewing the Commit History:
 - a. Use Git commands to view the commit history and ensure that all commits are in place.

```
C:\Users\SHAM\Suyat_local_project>git log --oneline --graph --all
* db0e8b0 (HEAD -> main, feature_x) feat: add feature.js with initial experimental logic
* bd1733c initial commit: add readme
```

7. Tagging Versions (Optional):
 - a. After completing the merge, use the git tag command to create a tag named v1.0 to mark the first version of your project.

```
C:\Users\SHAM\Suyat_local_project>git tag -a v1.0 -m "Version 1.0 release"
C:\Users\SHAM\Suyat_local_project>git tag
v1.0
```
